

Child's Name: _____

DOB: ____ / ____ / _____

Social Group Placement Questionnaire

Our social learning groups are for children who have near-typical to typical cognitive and language skills. These groups will support your child's ability to understand and navigate age-appropriate social situations. In order to determine if your child would benefit from this programming, please complete the following form to the best of your knowledge. It may be helpful to talk to other professionals that interact with your child (e.g. teacher, therapists) and get their feedback regarding the questions below.

Check YES or NO for the questions listed below:

1. Is your child able to sustain attention for more than 10 minutes in a small group setting by attending and keeping his or her body in the group?
 YES
 NO
2. Is your child able to verbally communicate a variety of thoughts and ideas?
 YES
 NO
3. Does your child initiate play with others?
 YES
 NO
4. Does your child take at least 3-4 turns in a conversation with a peer?
 YES
 NO

If you said **YES to all** of the above questions it is likely that your child is ready for a full Social Learning Group Assessment. This assessment will determine the type of social communicator your child is and allow us to determine the best group fit for your child.

If you answered **NO to any** of these questions, it is likely that your child would get the MOST benefit out of individual sessions with focus on precursor social language skills before entering Social Learning Groups at KIDS Therapy.

You may choose to pursue a Social Learning Group Assessment if you would like to gain further information about the type of social communicator your child is and receive parent education on social learning.

If you would like to receive a full Social Group Assessment or an assessment for individual speech and language therapy, please contact the scheduling department at KIDS Therapy at (858) 673-5437 to book the next available appointment.

Thank you! We appreciate your time and effort in making this a successful and beneficial program for all participants.
